DETAILED ACTION

- This action is responsive to the following communication: an Amendment filed on 4/24/07.
- Claims 1-4, and 13 have been canceled.

Response to Arguments

Applicant's arguments, see pages 19-21, filed 4/24/07, with respect to independent claims 17, 19, 20, 24, and 35-38 have been fully considered and are persuasive. The prior art rejection of claims 17, 19, 20, 24, and 35-38 has been withdrawn.

Allowable Subject Matter

Claims 5-12 & 14-38 are allowable over prior art of record (renumbered as claims 1-33). The following is an examiner's statement of reasons for allowance: The cited prior arts (US 4839829 to Freedman; US 5732400 to Mandler et al; US 5598279 to Ishii et al) of record teach a system for producing prints submitted by the customers, but the cited prior arts of record fails to teach and/or suggest "a risk calculating module for calculating a credibility relating to a purchase of a printing pictures made by the customer from information relating to the customer associated with identification information, calculating a risk ratio based on said credibility, and outputting said alert information when said risk ratio is above a predetermined value, and wherein said identification information is given to the customer in exchange for receiving the image data, and wherein said image data storing module instructs a first terminal to display the image data by an input of said identification information from the first terminal and in combinations of other features" as cited in independent claims 17, 19, 20, 24, and 35-38 (renumbered as claims 1, 5, 8, 14, and 17-18, 32-33 respectively). The examiner found neither prior art cited in its entirety, nor based on the prior art, found any motivation to combine any of prior arts that teaches the above limitations and in combinations of other features cited in claims 17, 19, 20, 24, and 35-38 (renumbered as claims 1, 5, 8, 14, and 17-18, 32-33 respectively).
